

## Press Release – Roller Blind System Silent Gliss 4900, 4905, 4910 & 4960

### Improvement on Excellence

With the introduction of systems Silent Gliss 4900, 4910 and 4960, already excellent products are now even better. The new streamlined range offers major improvements in functionality, comfort and design and as well facilitated installation possibilities.

Not only offer these systems unreached smooth down- and upward operation of the blind due to sophisticated technique, they can even be equipped with three different bottom bar designs. Further improvements include click-in brackets which allow the installation even in narrow recess fitting gaps, side guide option which keeps the fabric in position in case of air movement and side-by-side installation to reduce the light gap between the blinds.

### Silent Gliss 4905 – The Colour Statement

Small, trendy and colourful – the system Silent Gliss 4905 discreetly adapts to every room design. It features elegant brackets, a slim tube and a discreet bottom bar. It fits perfectly into smaller window frames without appearing obtrusive.

A great system and great colours! All the hardware parts can be produced colour matched across a wide range of colours. When combined with one of the 27 colours (plus silver) from the best selling Silent Gliss fabric Colorama, the blind will perfectly fit to almost any interior design scheme. A smooth chain operation, side-guide option and click-in brackets complete this chic system!

Silent Gliss 4910 – The Bestseller!

Three elegant bottom bar designs enhance every system

Click-in bracket for easy installation

Colour your life with system Silent Gliss 4905
